

YASH KONDLEKAR

[Portfolio](#) • (+61) 411 390 613 • yashk9100@gmail.com • [LinkedIn](#)

Passionate about designing and developing scalable, high-performance applications, I thrive in building seamless user experiences and solving complex problems. With experience in frontend and backend development, I enjoy working in collaborative, fast-paced environments, ensuring efficiency, maintainability, and innovation to provide full-stack solutions. My expertise lies in **JavaScript, React.js, Next.js, REST Api, .NET technologies and SQL**, but also hold keen interest in Node.js, MongoDB.

EXPERIENCE

2022 – PRESENT

Software Engineer | *Stride Solutions* | South Yarra, Melbourne

Achievements:

- ✓ Developed and maintained enterprise level mobile/web applications for various clients, primarily **Betr/Bluebet** in **online wagering/gambling industry**.
- ✓ Leveraged HTML/CSS, **Javascript, React.js, Next.js**, and **Flutter** for front-end development.
- ✓ Improved loading time by 35% by implementing features like **Server-side rendering, Static-site generation** and **lazy loading**.
- ✓ Implemented refactoring of website after migration, using **Material UI, CMS**, Custom **Hooks** and **Redux** tool kit for state management to ensure smooth and responsive UX.
- ✓ Developed efficient widgets for **cross platform mobile applications** using Flutter and Dart.
- ✓ Designed and developed **RESTful APIs** using C# .NET 6 Controllers, following clean architecture to support scalable solutions.
- ✓ Utilized **Entity Framework Core** (Code-First) to model databases and implemented optimized queries using **LINQ**.
- ✓ Managed **MS SQL** database using SQL queries, Joins, views and indexes for better data integration and efficiency.
- ✓ Integrated multiple third-party systems and external APIs to enhance system interoperability and scalability.
- ✓ Implemented unit and integration **testing** strategies using Jest, Cypress, NUnit ensuring code quality and high testing coverage.
- ✓ Leveraged **JIRA, Azure DevOps, BitBucket** skills for version control and CI/CD practices to manage code/project efficiently with team members.
- ✓ Collaborated with Business Analysts, Project Managers, UI/UX designers and clients to **gather requirements, estimate effort** and ensure realistic project deadlines.
- ✓ **Mentored** 3 junior software developers, conducted **code reviews** and promoted best practices to enhance team efficiency by 20%.
- ✓ Created/Maintained **technical documentations**, ensuring seamless knowledge transfer and development consistency.
- ✓ Led product showcases and presentations, fostering transparency and effective **stakeholder engagements**.

- ✓ Followed **Agile methodologies**, participating in sprint planning, conducting retros and standups for smooth execution and delivery.

MARCH 2022 – JULY 2022

Android Developer | Deakin University | Burwood, Melbourne

Achievements:

- ✓ Authored comprehensive software requirements specification document ensuring clear guidelines and expectations for the development process.
- ✓ Designed high-fidelity UI-UX prototype using Figma, enhancing user engagement and experience.
- ✓ Transitioned prototype into a functional mobile application meeting all requirements for Australian-Korean Government Foundation.
- ✓ Successfully developed android application using Java and Android studio to demonstrate kids-friendly satellite communication introductory app.

SEPTEMBER 2018 – OCTOBER 2019

Software Developer | Zicuro Technologies | Mumbai, India

Achievements:

- ✓ Developed and maintained desktop application (UI), using WPF with MVVM architecture, connecting to Gateway Application.
- ✓ Built and optimized middleware ASP.NET app (Gateway) using MVC architecture creating controllers for REST APIs integration with UI and Server.
- ✓ Established robust database connections using code-first Entity Framework core models and LINQ.
- ✓ Maintained existing C++ console application (Server) leveraging socket connection, C++ STL and data-structures to store, update and transmit real time data to UI.

SKILLS

Front-end: HTML & CSS | JavaScript | React.js | TypeScript | Redux | CMS | Next.js | Material UI

Back-end: REST APIs | ASP.NET | .NET core | C# | C++

Testing & CI/CD Tools: Jest | Cypress | React Testing Library | NUnit | Version-control | Azure DevOps | Vercel

EDUCATION

Master of Science (I.T) | Deakin University | Melbourne

Bachelor of Engineering (I.T) | Mumbai University | India
